

**Developing web pages using basic HTML tags**

1. Make a folder in the desktop using your index number

- a) Open Notepad++ text editor and type the following HTML code  
Save it as ***first.html*** and view it in a web browser

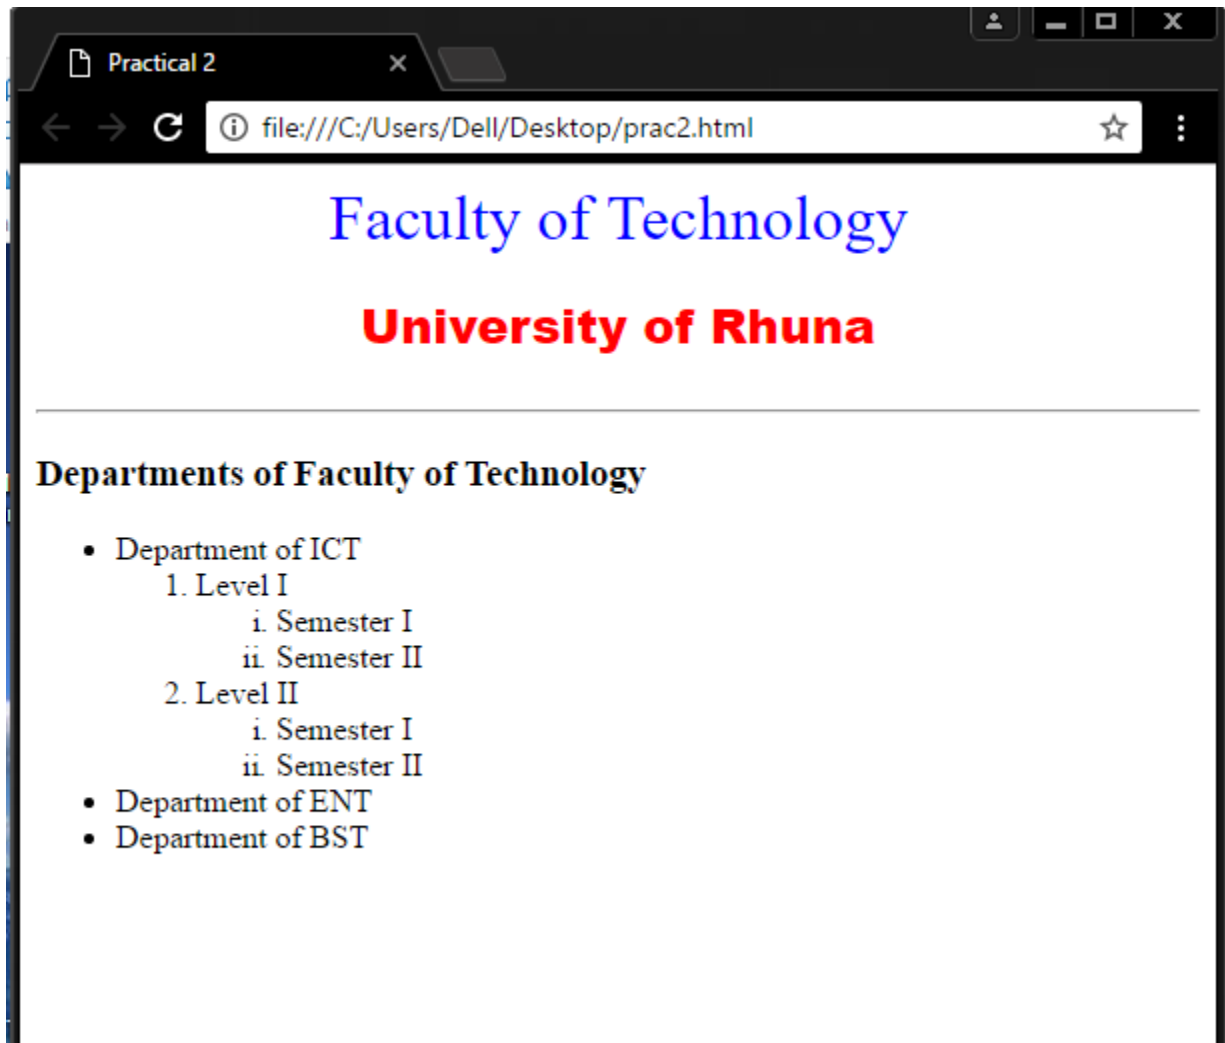

```
<html>
<title>Learning HTML</title>
<body>

    <h1>HTML Definition</h1>
    <p> HTML (Hypertext Markup Language) is the set
    of markup symbols or codes inserted in a file intended for display
    on a World Wide Web browser page
    </p>
</body>
</html>
```

- c) Open the ***first.html*** file in Notepad++ (right click on first.html → edit with Notepad++) and write the required code to display following lines in the web page

*This web page is created by ICT – Level 1 students on 15<sup>th</sup> February 2022*  
<Second practical>  
ICT @Technology

2. Write required html code to get following output.  
Save it as a *third.html*

3. Do the following changes to *third.html* and save it as a different file called *fourth.html*

- a. Add the given below paragraph before the horizontal line

The Faculty of Technology was officially established under the gazette notification issued on 26.04.2016 with four Departments, namely, Engineering Technology, Information and Communication Technology, Bio Systems Technology and Multidisciplinary Studies.

- b. Add Multidisciplinary Studies as another department in the department list  
c. Add a comment at the end of the code as “***This the modified version of third.html***”  
d. Add another horizontal line after the newly added paragraph

- e. Change the background color into yellow
- f. Add given below lines with the appropriate heading tags.

Academic sessions started on 16<sup>th</sup> of January 2017 ← **h2 heading**

Orientation program ended on,

15<sup>th</sup> of January 2017 ← **h3 heading**
